Subject: PWS for the 2016 task order for SRC (Syracuse)

Hi everyone,

As we have been discussing, this will be the last task order for Syracuse under the BPA. In the past we have had 3 different task orders and they covered all IRIS chemicals. I compiled the tasks from the 3 task orders into 1 and this current TO will only apply to assessments that SRC has worked on recently – the list is in the introduction of the PWS.

Each Task has a table that lists the chemicals that will have work done for that specific task as well as an estimated number of jobs we will be requesting - these were based on feedback that I have already gotten from you. There were a few chemicals/tasks that I thought would probably need to be done so I added them but I'm not sure (see the highlighted chemicals). Please make any edits you need (both to the text and/or the chemicals listed under each task) and send back to me by **Tuesday, February 16**. After that we will do our cost estimate and have it put into EAS so that it will be ready to go when the current TO expire in March.

Thanks so much!
Vicki
